**LANDSCAPING SPECIFICATION**  
 Trees  
 All trees to be of standard size when planted, each tree to be suitably staked. The following species to be used:  
 Cm – Crataegus monogyna (Hawthorn)

**Planting**  
 All planting to be carried out between November and March after the development has been completed, only species that are suitable for planting in the autumn and winter months are to be used. All planting to be completed by 2 planting seasons or later than the end of the planting season following their death.

**Existing Trees**  
 All existing trees to be suitably protected by temporary fencing around the crown spread of the trees.
